Product Description

ASCO™ 8327B122 Manual Reset, Solenoid - Direct Acting Solenoid Valve

Product Description

The ASCO Series 8327B122 is a line of 3/2-way direct-acting solenoid valves requiring zero minimum operating pressure. Its balanced poppet construction permits high flows at minimum power levels, making it ideal for power plants, refineries, and chemical processing facilities. The valve's PTFE rider rings and graphite-filled seals reduce friction and eliminate sticking to provide exceptional service life. The 3/2-way direct-acting solenoid valves are ideal for process valve piloting applications.
